Amazon Clone

Tech used - HTML , CSS

This project is a static Amazon-inspired e-commerce website built using HTML and CSS. It features a visually appealing home page showcasing featured products and categories, along with a well-organized product listing section. The focus of this project is on creating a clean and structured layout with consistent styling.

DOC-BOT

Tech used - HTML , CSS , JavaScript ,
PHP , MySQL

DOC-BOT is a smart, user-friendly platform that allows individuals to quickly consult a virtual doctor by simply entering their symptoms. Using a combination of HTML, CSS, JavaScript, PHP, and a MySQL database, we built a complete system that is easy to navigate, fast, and efficient. Our system analyzes the user's input through Rule-Based AI Logic – which matches symptoms with pre-defined medical conditions to suggest possible diagnoses.

E-Commerce

Tech used - HTML , CSS , JavaScript ,
PHP , MySQL

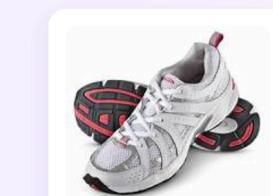

EZCommerce is a dynamic web-based application that streamlines the operations of an online shopping platform. The system is designed to support administrative control, vendor operations, and customer shopping experiences in one unified environment.

Developed using HTML, CSS , PHP, and MySQL, the project features a modular architecture with well-defined components
